

Debug

The top diagram shows the AD9415 with various components labeled for debugging. The components include resistors R16 (10k), R17 (10k), R18 (10k), R19 (1M), and R20 (1k). Capacitors C19 (22uF), C20 (100nF), C21 (100pF), and C22 (100pF) are also shown. A 47nF capacitor is connected to VCC1 and GND. The bottom diagram shows the AD9415 with various components labeled for debugging. The components include resistors R21 (220k) and R23 (1M). Capacitors C24 (0uF), C25 (100nF), C26 (5pF), C27 (22uF), C28 (100nF), and C29 (100nF) are also shown. A 2.2uF capacitor is connected to VCC1 and GND.
